MOI Community Call #7

Updates and New Campaigns

COMMUNITY UPDATE

ETHDenver: The Vibe & The Hype

The Ground Reality

The energy was massive—builders are moving past theoretical infrastructure and focusing entirely on shipping usable applications.

Where the Attention Is

AI Agents acting autonomously on-chain, the next evolution of DeFi, and consumer-facing Web3 apps completely dominated the conversations.

COMMUNITY UPDATE

ETHDenver: The Vibe & The Hype

DEVREL UPDATE

Protocol & Documentation Updates

Protocol Upgrades

Faster state transitions, optimized routing, and significant bug fixes for a high-performance network.

Documentation Revamp

Streamlined, practical docs focused on getting builders to execution faster with less friction.

DEVREL UPDATE

MOI Forge Builder Milestones

Boiler Blockchain

Successfully completed the build of Sageo, taking a raw concept to a tangible product on MOI.

PCCOE

Currently executing complex, ongoing infrastructure work on the Lux AI and Zero Trust projects.

DEVREL UPDATE

MOI Forge x Oxford Blockchain Society

Official Partnership

Joining forces with the Oxford Blockchain Society to bring rigorous academic validation to the MOI ecosystem.

What This Means

Serious, institutional pressure-testing of our participant-centric architecture and technology stack.

DEVREL UPDATE

Teasing MOI Sprint

Gamified Developer Onboarding

An interactive, step-by-step learning platform designed specifically for builders on the MOI network.

The "Speedrun" Experience

Complete scoped challenges, deploy code, and level up—getting devs from zero to deploying logic in an afternoon.

Piyush Maheshwari

Head of Business and Ecosystem, MOI

Formerly at Outlier Ventures, Polygon Labs, and Protocol Labs.

MOI X PRESIDENCY UNIVERSITY

GAIN MORE KNOWLEDGE
REACH GREATER HEIGHTS

MOU signed with the Presidency University

Speaker: Dr. Abirami, Professor - Computer Science and Engineering.

PARTNERSHIP

Presidency University × MOI Collaboration

We are pleased to collaborate with MOI as part of a long-term academic–industry initiative focused on emerging digital infrastructure and next-generation technologies.

This partnership reflects our commitment to:

- Innovation-driven education
- Industry-aligned learning
- Preparing students for future technology ecosystems

PARTNERSHIP

Why This Collaboration Matters

Technology is evolving rapidly across:

- Blockchain & digital infrastructure
- AI-driven systems
- Digital identity & trust networks

Universities play a critical role in ensuring students are prepared for these shifts.

Collaborating with technology ecosystems like MOI enables:

- Real-world exposure
- Advanced learning opportunities
- Stronger academic relevance in emerging fields

PARTNERSHIP

Opportunities for Students

Through this collaboration, students at Presidency University will gain:

- Exposure to next-generation blockchain & trust infrastructure
- Hands-on workshops and technical sessions
- Participation in advanced developer programs like MOI Forge
- Interaction with global developer communities
- Opportunities for innovation, research, and contribution

This ensures learning extends beyond classrooms into real-world applications.

PARTNERSHIP

Importance of Industry–Academia Partnerships

Strong collaboration between universities and technology ecosystems helps:

- Bridge academic learning with industry practice
- Enable innovation and experimentation
- Enhance student career readiness
- Create research and development opportunities

Such partnerships help institutions stay aligned with the technologies shaping the future.

PARTNERSHIP

Message to the MOI Community

We are happy to be part of the MOI ecosystem and look forward to this collaboration creating meaningful opportunities for our students.

We welcome continued engagement with the MOI community and are excited to see our students learn, build, and contribute to emerging digital infrastructure.

Together, we aim to prepare students for the technologies that will define the future.
