Coming Soon

Interactive Campaigns

More fun campaigns and interactive experiences for the community.

Deeper Engagement

A stronger community feeling and deeper engagement across channels.

Lunar Strategy

Elevated community management with our new growth partner.

Big Things Ahead

The momentum is building — let's keep building this together.

GUEST SPEAKER — 01

AGENTIC SOLUTIONS

Steven Bryson Haynes

President & Co-Founder
Agentic Solutions

GUEST SPEAKER — 01

STEVEN BRYSON HAYNES

Who We Are

The commercial arm of elizaOS.

- Agents that run on *your* infrastructure
- Frameworks tuned to run well on-premises
- Each agent given a “soul” — trained on your business

GUEST SPEAKER — 01

THE TREND

Agents Now Act

A year ago, agents answered. Now they act.

01 Agents take actions

02 Agents call other agents — chains form

03 A new workforce — and a quiet new problem

GUEST SPEAKER — 01

THE CHALLENGE

Where Your Data Goes

The hard part is never “can the AI do it.”

01 Your data leaves — to someone else’s cloud

02 Authority — one shared key does everything

03 And no way to tell who did what

GUEST SPEAKER — 01

THE PROBLEM

The Trust Problem

What's actually at stake.

01 Agents act — and call other agents

02 They run on a shared password

03 A house key to water one plant — it opens every door

OUR SOLUTION

Keep It In Your Building

The simplest answer first.

01 On-prem, air-gapped — data never leaves

02 Human-in-the-loop, full audit trail

03 But agent-to-agent needs a second layer

GUEST SPEAKER — 01

THE ANSWER

Where MOI Fits

It stops treating the password as the identity.

01 Identity stays with the participant

02 Agents get a narrow, revocable permission slip

03 One job — checked, scoped, provable

GUEST SPEAKER — 01

CLOSE

Agents You Can Actually Turn Loose

Not short on smart models — short on trust.

01 Context & memory

02 Trust — scoped, revocable, provable

03 Agents you can turn loose on real work

GUEST SPEAKER — 02

Pratik Jagdale

Developer · PCCOE
Building on MOI Protocol

A developer shipping real products on MOI — bringing Lux AI and ZeroTrust to the network.

PRATIK JAGDALE

Live Demos

GUEST SPEAKER — 02

DEMO 01

Lux AI

An agent-driven build on MOI.

DEMO 02

ZeroTrust

Participant-anchored permissions in action.

THANK YOU
